

Detached family house – Lueneburg

...the innovative hot water solution.

Reference:

Luxury detached family house in Germany, living area 250 m² approx.

The house was built around the turn of the last century and reconstructed in 1994. In doing so, the former oil heating for a central hot water supply was replaced by a modern gas calorific value appliance (for the room heating) and a decentral hot water supply by using instantaneous water heaters. In 2002, an annex with a wellness bath was added to the house.

Units installed:

- 3 DX 24 all-electronically controlled instantaneous water heaters (24 kW, 400 V) for the supply of shower and bathtub in 3 separate bathrooms
- 3 CBX11 compact electronic instantaneous water heaters (11 kW, 400 V) for the direct supply of every single wash basin in the wellness bath
- 1 CBX13 compact electronic instantaneous water heater (13 kW, 400 V) for the kitchen sink
- 1 MH6 small instantaneous water heater (5.7 kW, 230 V) in the lavatory
