ThyssenKrupp headquarters – Essen

Object:

After the opening of the German ThyssenKrupp headquarters in 2010, the campus was expanded by three nearly equal looking office buildings. The buildings are open and transparent designed in the style of the company's corporate architecture. The new buildings can accommodate around 1.000 employees. The high energy efficiency was considered by the building technology. In particular the hot water supply with CLAGE electronic water heaters ensures excellent comfort with low operating costs. Compact instantaneous water heaters were installed in the kitchens and small instantaneous water heaters were used for the hand-wash basins in the washrooms.

Architects:

JSWD Architekten GmbH & Co. KG
Maternusplatz 11, 50996 Köln, Germany

Atelier d'architecture Chaix & Morel et associés
16 rue des Haies, 75020 Paris, France
